

The diagram illustrates the relationship between three key page layout concepts: BLEED, TRIM, and MARGIN. It features a large rectangular frame with a dashed magenta border. Inside this frame is a smaller rectangle with a solid blue border. The area between the dashed magenta border and the solid blue border represents the 'BLEED' area. The area inside the solid blue border represents the 'MARGIN' area. The 'TRIM' area is the final size of the page after the bleed is cut off, which is the area defined by the solid blue border.

● BLEED    ● TRIM    ● MARGIN
